

CIVILIAN PROGRAM

D-PAD PLATFORM

New Mobility and Security for our Civilian customers in connection with Floods and Natural disasters where you need to save your personal material and or vehicle.

The D-Pad platform from Nordic Deployment revolutionizes how to navigate in water environments, eliminating the need to build bridges or deploy amphibious bridge structures.

Robust and reliable design Constructed from a rigid inflatable structure, the D-Pad platform ensures that your vehicle remains afloat while on board. Whether you need to transport a vehicle regardless of size or weight.

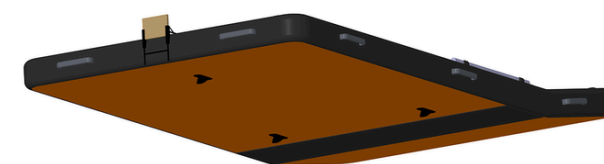

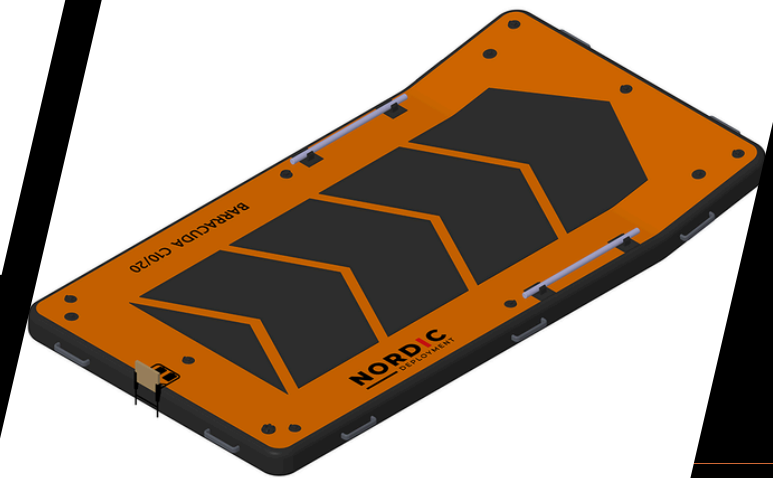

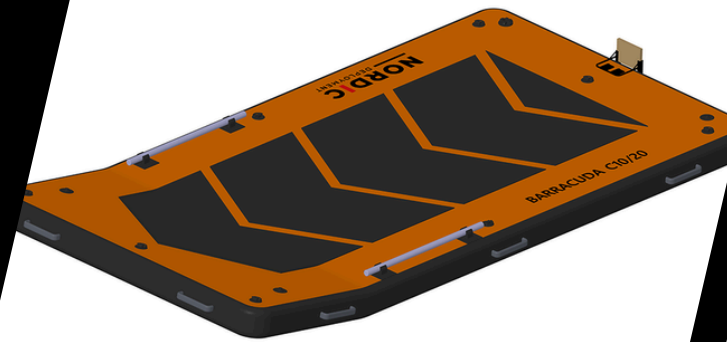

Nordic Deployment can design and construct a customized D-Pad platform to meet your specific requirements.

EASY DEPLOYMENT AND OPERATION

1. Remove the D-Pad platform from the rugged travel case.
2. Roll out the platform.
3. Install the pumps and inflate the platform.
4. Set up the ramps and the motor on the supplied motor mount. (Extras)
5. Drive the vehicle onto the platform.
6. Secure your personal belongings from the flood and the water.

With the D-Pad platform you achieve seamless aquatic mobility, which increases safety in all emergency situations where floods and disasters exist. Experience the future of civil logistics with Nordic Deployment's D-Pad platform.
