

NORDIC C-PAD

CIVILIAN PROGRAM

New Mobility and Security for our Civilian customers in connection with Floods and Natural disasters where you need to save your personal material and or vehicle.

The C-Pad platform from Nordic Deployment revolutionizes how to navigate in water environments, eliminating the need to build bridges or deploy amphibious bridge structures.

ROBUST AND RELIABLE

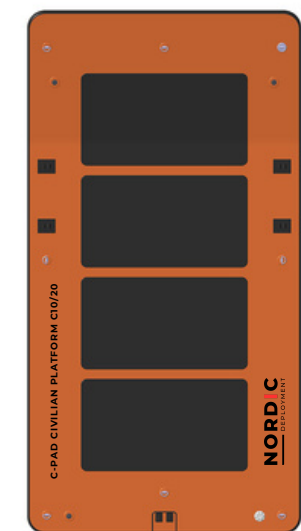

Design Constructed from a rigid inflatable structure, the C-Pad platform ensures your vehicle remains afloat while on board. Whether you need to transport a vehicle of any size or weight. Nordic can design and construct a customized C-Pad platform to meet your specific requirements.

EASY DEPLOYMENT AND OPERATION

- Remove the C-Pad platform from the rugged travel case.
- Roll out the platform.
- Install the pumps and inflate the platform.
- Set up the ramps and the motor on the supplied motor mount. (Extras)
- Drive the vehicle onto the platform.
- Secure your personal belongings from the flood and the water.

With the C-Pad platform you achieve seamless aquatic mobility, which increases safety in all emergency situations where floods and disasters exist. Experience the future of civil logistics with Nordic Deployment's C-Pad platform.
